

# UF Health Web Services NEWSLETTER

University of Florida Health Communications & Information Technology

September 2019

## RSVP for the "Behind the Web" user conference!

Join us for our semiannual user-focused mini-conference, Behind the Web. This is a 2-hour professional development opportunity only for the Administrators and Editors of UF Health websites.

We are excited to feature presentations by a select group of users that have launched their Apollo 2 websites. They will walk us through some of the challenges they faced during migration and how they were able to use the tools and features of Apollo 2 to meet their needs.

*featuring...*

- Arts in Medicine
- The UF Health Cancer Center
- The McKnight Brain Institute

Wednesday, October 2nd, 9:00 - 11:00 am  
MSB Auditorium 6120 (Medical Science Building, sixth floor)

**[RSVP online](#) - seating is limited.**

*Please join us for light refreshments before the program, details to come for those that RSVP.*

---

## UF Health Directory Maintenance Planned for September 13 and 14

The development team will be performing maintenance to the UF Health Directory on:

- **Friday, September 13 11:30 pm to 12:00 am Saturday, September 14**

During this period, editing capabilities for profiles will be removed as changes are made to update the the site. This maintenance is not expected to interrupt site traffic or take sites offline. If you experience any problems, please let us know at [webservices@ahc.ufl.edu](mailto:webservices@ahc.ufl.edu).

## New Features!

### [Stale Content Audit Plugin](#)

The Stale Content Audit plugin is a custom tool that scans the site for pages and posts with content that hasn't been updated in 6 months, and is considered "stale". Site users will receive an report from the plugin periodically that catalogs the content which needs to be updated or generally addressed across all of the sites they

currently or previously had access to edit. That email includes basic data about what the audit generated for them, a CSV file for that data, and a link to an page in WordPress where they can view and interact with the data. Site Administrators will receive an additional CSV file with the data for all stale content across the site. If a user is the lead site administrator, they receive an additional report of all stale pages for all users across that site.

### [Check Out the New Icon Library!](#)

A new feature for Apollo 2 is the addition of a library of 5,000+ icons that can be used to add simple imagery to your site. The icon library can be viewed through the "Icon" tab for: Cards block and Buttons block. [View examples of icons in cards and buttons.](#)

### [The New Buttons Block Takes the Stage](#)

A new block has been released by Web Services that makes the addition of buttons to your site much simpler! With the Buttons block, you can add one or more buttons to your site without the need to use HTML code. Simply select the "Buttons" block from the [Add Block tool](#) and begin creating your buttons. Options include alignment for left, right, and center, and the option to display buttons in a 1-3 column format, and three color options: bright blue, gray blue, and orange. Buttons also support the use of an icon from the icon library with each button for simple, and complimentary imagery for your buttons. [View Buttons using the new icon library!](#)

## Ready to make the switch to Apollo 2?

[Take advantage of the new features](#) and kick your site into high gear by migrating to the Apollo 2 theme! Web Services is here to help you along the way including help with training, and strategies to put your best foot forward on your new homepage.
